The Four Factors of Risk - American Management Association There are four main factors that contribute to the perception of risk in the mind and heart of the customer. 1. The size of the sale. The larger the sale, the more money involved, the greater the risk. If a person is buying a package of Lifesavers, the risk of satisfaction or dissatisfaction is insignificant. Risk Factors for Cancer - National Cancer Institute (There are also factors that are linked to a lower risk of cancer. These are sometimes called protective risk factors, or just protective factors.) Cancer risk factors include exposure to chemicals or other substances, as well as certain behaviors. They also include things people cannot control, like age and family history. A family history of certain cancers can be a sign of a possible inherited cancer syndrome. 4 Top Risk Factors Associated with Dementia The researchers stated they wanted to focus on modifiable risk factors which could help people plan the right interventions to effectively reduce their chances of developing this neurological.

What Are the Risk Factors for Heart Disease?, HHS, NIH, NHLBI Each risk factor greatly increases a woman's chance of developing heart disease. But having more than one risk factor is especially serious, because risk factors tend to "gang up" and worsen each other's effects. Dementia: 4 Risk Factors Associated With The Disease Age is considered the most significant risk factors for this disease which rarely affects those under the age of 60. According to estimations by the Alzheimer's Association, one in three senior Americans dies with some form of dementia. Heart Disease Risk Factors - New York State Department of ... The following are common risk factors that can lead to cardiovascular disease: High Blood Pressure High blood pressure, or hypertension, is a major risk factor for heart disease.
