Fractal Image Encoding - Virginia Tech Fractal Image Compression: Theory and Application to Digital Images, Yuval Fisher (Ed.), Springer Verlag, New York, 1995 is a collection of articles on Fractal Image Encoding. About this book: About this book: Fractal compression - Wikipedia Fractal compression is a lossy compression method for digital images, based on fractals. The method is best suited for textures and natural images, relying on the fact that parts of an image often resemble other parts of the same image. Fractal-based image encoding and compression techniques Fractal image compression is a technique based on the representation of an image by a contractive transform, on the space of images, for which the fixed point is close to the original image.

AN INTRODUCTION TO FRACTAL IMAGE COMPRESSION An Introduction to Fractal Image Compression 5 This simple looking theorem tells us how we can expect a collection of transformations to define an image. 3. Why the name "Fractal" ... a fractal encoding of Lena along with a magnification of the original. 4. How much Compression can Fractal achieve?. Fractal image compression using upper bound on scaling ... The proposed method provides enough speed-up in image encoding. It is faster than many fast variants of Fractal compression methods. Our method is unique to exploit analytically found upper-bound for speed-up. Cuckoo inspired fast search algorithm for fractal image ... The high encoding time due to the complex search in identifying the similar blocks in given image is the significant constraint of the traditional fractal image compression, which has the iterated function system (Barnsley and Sloan, 1990) as backbone of the fractal image compression. Hence the decreasing encoding time in fractal image.

FRACTAL IMAGE COMPRESSION - NASA FRACTAL IMAGE COMPRESSION Michael F. Barnsley and Alan D. Sloan Mathematics, Georgia Tech ABSTRACT ... The basis for fractal image encoding is the COLLAGE THEOREM: Let  $B$  be a target image and let  $C$  be an ifs code with contractivity factor  $0 < s < 1$ .
